

## INGEO™ PLA MARKET APPLICATIONS

Natural and organic food products are experiencing tremendous popularity and sales growth. The same consumers that care so much about what they eat care just as much about how their food is packaged. When packaging matters, Ex-Tech Plastics sheet made from Ingeo™ biopolymer is the optimal solution.

Made from dextrose, a natural sugar derived from plant starch, Ingeo™ gives you the ability to make environmentally sensitive products that complement and add value to the products they contain.

Sustainable Solutions 7000 Series	Characteristics	End-Uses
Ingeo™ PLA (Polylactic Acid)	<ul style="list-style-type: none"> <li>• Made from annually renewable resources</li> <li>• Improved environmental footprint (requires less nonrenewable energy and generates significantly less greenhouse gas)</li> <li>• Excellent flavor and aroma barrier</li> <li>• Food contact approved</li> <li>• Superior print and lamination</li> <li>• High gloss</li> <li>• Stiffness allows for down gauging</li> <li>• Food contact approved</li> <li>• Superior visual qualities</li> <li>• High modulus</li> <li>• Compostable</li> </ul>	<ul style="list-style-type: none"> <li>• Food packaging</li> <li>• Organic, in-store prepared food packaging</li> <li>• Thermoformed hinged packaging</li> <li>• Tray packaging</li> </ul>
